

## WELCOME TO AUA.

In the course of your stay here, you will get lots of emails from this department and many, many reminders. This is your first one.

Please, please, please,

### **TAKE YOUR PASSPORT WITH YOU TO REGISTRATION**

You will not be allowed to start the process without that vital document. If you have a US alien registration card, please bring that along with your passport.

The reason for this request is simply that the Commissioner of Immigration will be sending his officers along within a month of the registration process to regularize your permission to stay in Antigua. At that time, they will take your document details and endorse your passport with the stamp that allows you to stay in this country legally. *This is a vitally important matter with serious legal implications.* So important, in fact, that we won't even begin your registration process unless you produce your passport and alien card, if you have one.

You will need to bring to the officers, your passport, the copy we will give you for them, **and** the copy of your Registration Confirmation which you will get from the registrar.

We will also make photo copies of your passport and card for our records. This is a requirement of the authorities here and this information is stored in locked cabinets at all times.
